## Heart Health - Presenter Key

1. **False.**

Heart disease is the leading cause of death for both men and women. About 647,000 Americans die from heart disease each year. That's 1 in 4 deaths.

2. **47%**

About half of all Americans (47%) have at least one of the 3 key risk factors for heart disease: **High blood pressure, high cholesterol or smoking.**

3. **About one-quarter**

Every year, about 805,000 Americans have a heart attack. Of these, 200,000 - or about one-quarter - happen to people who have already had a heart attack.

4. **Nausea, unexplained tiredness and jaw pain.**

Women are more likely than men to experience **nausea, unexplained tiredness and jaw pain.** In addition to these symptoms, signs of heart attack in men and women include chest pain (angina) and shortness of breath.

5. **Atherosclerosis**

Happens when plaque builds up in the arteries that supply blood to the heart (called coronary arteries). Plaque is made of cholesterol deposits. Plaque buildup causes arteries to narrow over time.

6. **Drinking 3 servings of alcohol**

Is **not part** of a healthy lifestyle. Drinking too much alcohol can raise blood pressure levels and the risk for heart disease. Women should have no more than one alcoholic drink per day. Men should have no more than 2 alcoholic drinks per day.
